

CLIPPER – AUTOMAT ON CONTINUOUS CLIP TECHNOCLIP CSA 21-100

1. SUITABLE FOR CLIPPING OF ALL ARTIFICIAL AND FIBROUS SAUSAGE CASINGS
2. SUITABLE FOR CLIPPING OF COLLAGEN AND NATURAL SAUSAGE CASINGS
3. FIRM AND RELIABLE HOLDING OF CLIP ON THE CASING
4. COMPATIBILITY WITH ANY FILLER

APPLICATION AREA

Clipping machine TECHNOCLIP CSA 21-100 is designed for clipping of two ends of sausage loafs at once, in automatic mode. It is intended for use at medium and large sausage producing factories. Allows to clip any artificial and natural casing with diameter from 30 mm to 100 mm. Clipping machine is completed with the looping tray. Allows to produce different meat products: small sausages, single sausages, and also sausage chains.

ADVANTAGES

- User-friendly quick and easy working process
- Tight and reliable closing
- Possibility of equipping with additional options
- Easily aggregates with fillers of any manufacturer
- Hygienic stainless-steel construction
- Optimal price/quality balance

FUNCTION AND OPERATION

Automatic clipping machine TECHNOCLIP CSA 21-100 was developed considering the advantages of clippers from leading world manufacturers. It is intended for clipping of all types of casings. Provides reliable clip closing due to the smooth adjustment of the clip force. Has 9 speed levels, which allows to reach productiv cycles per minute. Due to construction elements, the clipping achieve different degree of sausage stuffing, upon the custo

TECHNICAL PARAMETERS

Caliber of casing, mm	40-100
Clipping speed	up to 100 cycles per minute
Clips type and size	continuous clips 15/18
Loop type	20/100
Cut-off knife	automat
Overall dimensions	128x1000x1700
Weight, kg	500
Electric power supply	380 V 50 HZ
Power	3.5 kW
